2019 Waste Collection Calendar

Rocher-Percé RCM

Régie intermunicipale
de traitement des matières
résiduelles de la Gaspésie

Réduire l'empreinte écologique, **c'est l'affaire de tous.**

OVERVIEW AND COSTS

What were the defined objectives?

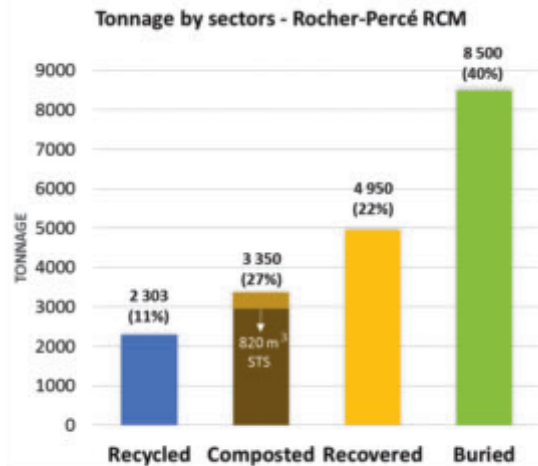

- 1 Bury less than 550 kg of waste/inhabitant
- 2 Recover at least 70% of recyclable materials
- 3 Reduce the quantity of buried CRD residues by 35%

Our 2017 Overview

The materials generated on our territory are directed to 4 sectors: Composting, recycling, eco-centers and landfilling.

In 2017, we were still sending 40% of our materials to landfill, but only 22% of them were real trash.

*STS: Septic tank sludge

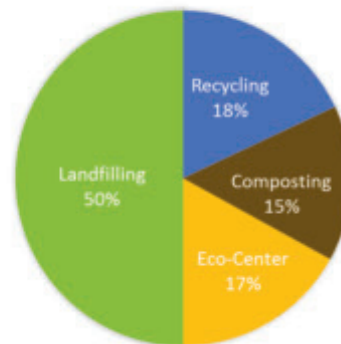

On the RITMRG logo, the 4 sectors are shown by the leaves. Green for landfilling, blue for recycling, yellow for the eco-centers and brown for composting.

How much does it cost?

Management of Residual Materials Budget
Rocher-Percé RCM

Total Budget : \$ 2,4 Millions / year

DID YOU KNOW?

Your efforts and participation have an impact on your taxes!
2010: \$ 300 / door
2018: \$ 230 to \$ 250 / door

Since 2009, the management of residual material is a priority on the territory

We create 19 000 tons of materials/year → **Increase** of 1%/year

We divert 60% of our landfilling materials → **Improvement!**

COLLECTION AND TRANSPORTATION

Collection Schedule

Every two weeks, all year

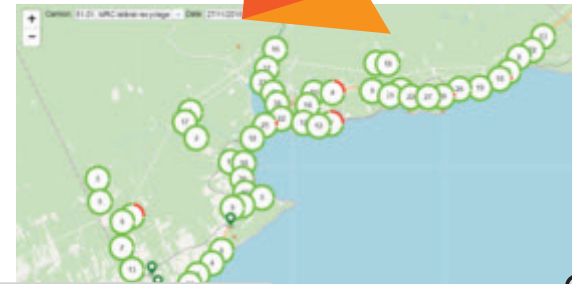

Summer: Each week
Autumn: Every two weeks
Winter: every three weeks

ATTENTION
As of January 1, 2019, the painted bins will no longer be emptied.

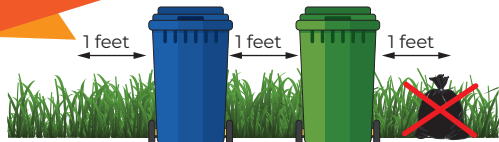

Reminder

You can use a big yard waste paper bag to avoid the materials sticking to your brown bin. 😊

What is the purpose of chips on my bins?

How to place my bin down the road?

WEATHER ALERT

Please note that in the event of a major snowstorm, the collection could be moved to the next day.

- ✓ Bin placed the day before collection
- ✓ Wheels facing the house
- ✓ No material placed beside or going above the bin
- ✓ Bin placed 1 foot away any object
- ✓ Bin on my property, at 3 meters (10 feet) of the white line / not on the sidewalk nor the street

You do not want the snowplow to overthrow your bin? **Follow this advice!**

What to do if my bin is broken or if it has not been picked up?

- Call us **AS SOON AS** you notice the damage or omission.

Together, we will find a solution!
RITMRG : (418) 385-4200

You often forget to place your bin down the road?
Memento sends you a FREE text message to remind you to get your bin out the day before collection!
Visit monmemento.ca

Where can I get a new bin?

In a hardware store for the recycling and waste bins.
For the brown bins, please call us!

Chips are used to:

- Indicate us at what point of its round the truck is at
- Calculate the participation rate to the right collections
- Identify the areas where to promote awareness

DID YOU KNOW?

In the RCM of Rocher-Percé, the participation rate with the blue bin is of 85% and 50% with the brown bin. If we were to increase the latter at 80%, we could expect savings of about \$200,000

Tél : (418) 385-1414

Ensemble, prenons soin de la planète

RECYCLING

What is the purpose of the blue bin?

The blue bin was set up to recycle **CONTAINERS, PACKAGING, PRINTS** from our consumer goods if they are made of **PAPER, CARDBOARD, PLASTICS, GLASS and METAL**.

So, I cannot put a plastic toy or a shirt in the blue bin because these are not containers, packaging or prints?

That's right!

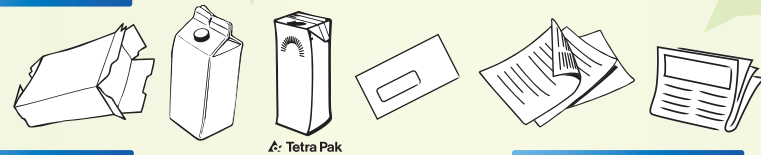

What does NOT go into the blue bin?

- Textiles**: T-shirt, socks, underwear
- Organic materials**: Meat, bones, shells
- Diapers**: Disposable diaper
- VHS**: Video cassette
- Pack of chewing gum**: Gum pack
- Laminated bag**: Laminated bag
- Chip bags**: Potato chip bag
- Multi-material objects**: Various mixed-material items
- Plastics**: Straw, coffee stirrer, styrofoam, plastic tableware
- Others**: Syringes, rifle bullets, dead animals

What goes into the blue bin?

Paper / Cardboard

Undo the boxes

Slightly rinse and drain

Tetra Pak

Remove the flyers from their plastic bag

Plastics Flexible

Put all bags made of flexible plastics together

How can I recognize flexible plastics?

If it elongates, it is recyclable!

Plastics Rigid

Drained

This symbol is used to identify the recyclable plastics

No not recyclable

Only the #6 is **NOT** recyclable →

Glass

Bottle and Mason jar

See the month of August for more details on the recycling of glass

Metal

Yes: same thing for aluminum plates and paper!

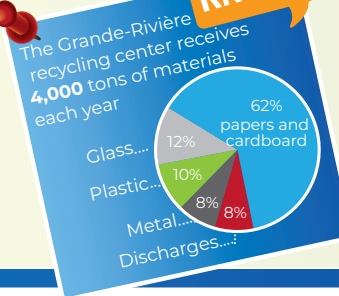

How can I know what to do with a material that is not mentioned here?

Download **Ça va où?**, the application from RECYC-QUÉBEC! (in French only) Or call the RITMRG!

Reminder

It is true that cardboard and paper are also compostable, but it is more profitable to recycle them! We should not be neglecting our blue bin. 😊

ECO-CENTER

Metal

All pieces of ferrous or non-ferrous metal

Sold to a recycling waste handler

Waste Electrical and Electronic Equipment (WEEE)

- Televisions
- Computers, keyboards, screens
- Printers
- Cellphones, cables, chargers, etc.

EPRA-Québec is responsible for the recovery of your devices' components

Household Hazardous Waste (HHW)

- Batteries
- Fluorescents and compact fluorescent light bulbs
- Paints and oils
- Fertilizers and pesticides
- Cleaning and scrubbing products

Used oils → **Campor** → Conditioning → New lubricating oil

Paints → **Laurentide re/sources** → Manufacturing of recycled paint

! ATTENTION

HHWs are accepted for free but to avoid impacts on health and environment, we must:

- **Keep** residues in the ORIGINAL and airtight containers
- **NOT** transfer products at the Eco-Center
- **NOT** throw the HHWs in the garbage

Bulky Waste

- Electrical appliances
- Tubs, sinks, toilets
- Mattresses, bedsprings, furniture
- Water heater, windows, etc.

- Dismantled to recover metal and wood
- Reused
- Last resort = Engineered landfill

Wood

- Branches
- Lumber
- Sound wood (pallets, untreated)
- Non-sound wood (painted, stained, treated)

- **Branches and sound wood** = Wood chips for composting
- **Non-sound wood** = Ground with asphalt shingle = Covering material at the engineered landfill

Asphalt Shingle

Tires

With or without rims
Maximum of 48 inches in diameter

- **Remoulded:** Remoulded tires
- **Recycled:** Stable mat, mudguard, speed bump, etc.
- **Recovered:** Use for energy purposes (cement plants, etc.)

Construction, Renovation and Demolition (CRD) Residues

Gypsum = Agricultural liming or others
Seeking new outlets:

- Vinyl siding (clapboard)
- Aggregates (concrete, stone, brick, asphalt, etc.)
- Insulation

DID YOU KNOW?

A CRD management guide is available on the RITMRG website to help your contractor apply more eco-friendly methods such as deconstruction.

NUMBERS THAT COUNTS!

In 2017, the three Eco-Centers of the Rocher-Percé RCM have welcomed nearly **4,500 visitors** for a total of **5,100 tons** of materials. From this tonnage, more than 65% have been recovered.

BULKY WASTE

What is a bulky waste?

An object we want to get rid of but that cannot be picked up during the regular collection due to its size and that can be recovered.

Characteristics to respect

Length:
Maximum 2,4 meters (8 ft)
Volume:
Maximum 3 m³
Weight:
Maximum 150 kg (300 lbs)

What is the purpose of this collection?

Even if all materials accepted in this collection can be brought to the Eco-Center all year long, this collection is offered to facilitate the disposal of materials by the citizens.

Preferable to the Eco-Center or HHW days in order to prevent the environmental degradation and preserve your confidential data. Complete list at pages 12 and 26.

IMPORTANT

This collection is for the RESIDENTIAL SECTOR ONLY

NUMBERS THAT COUNTS!

In 2018, it is 71 tons of bulky waste that have been recovered in Rocher-Percé RCM thanks to this collection.

Before the bulky waste collection, make sure your materials are:

- ✓ Out maximum 24 hours before your collection day
- ✓ Easy to access
- ✓ In your driveway (not behind a ditch)
- ✓ At a maximum of 2 meters (6,5 ft) from the road
- ✓ Separate tires, metals and the rest

What to put down the road for this collection?

Bulky Waste

- Electrical, eating and cooling appliances;
- Tubs, sinks, toilets, furniture, mattresses, bedsprings;
- Toys, bicycles, carpet and flooring;
- Water heater and tank;
- Ferrous or non-ferrous metals

Maximum 150 kg

Waste Electrical and Electronic Equipment (WEEE)

TVs, computers and peripherals, display device, printers and desktop devices, cellphones, audio and video systems, etc.

Wood pallets, doors, windows, BBQ (no bottle), pool components, styrofoam

Tires

With or without rims, smaller than 48 in

Recyclable materials (grouped or in a transparent bag)

Green Residues

Branches (max. 1 meter [3 feet], tied, max. 25 kg)
Leaves and lawn (in transparent bags or other than black or green)

Rejected Materials

Garbage bags, recyclable or compostable materials

Car hulks

Construction, renovation and demolition (CRD) materials

Animal remains

Logs, stumps

Household Hazardous Waste (HHW)

Tél. : (418) 689-4419 Fax : (418) 689-7753 Cell. : (418) 689-9989 Cell. : (418) 689-9925

 **Desjardins**
Coopérer pour créer l'avenir

Nous sommes nombreux à croire qu'investir en environnement est gage de prospérité durable.

Waste Electrical and Electronic Equipment (WEEE) and Household Hazardous Waste (HHW)

What do they have in common?

Waste Electrical and Electronic Equipment (WEEE) and Household Hazardous Waste (HHW) can contaminate the environment or cause health problems if they are not properly managed. They also have a great recovery potential, that needs to be increased.

HHW

Toxic, flammable, explosives, corrosive products or products that contain heavy metals

- ✗ In nature:** contamination
- ✗ In sewers:** Detrimental to the operation of wastewater treatment plants
- ✗ In the trash:**
 - Risks for the health and security of garbage collectors
 - Potential soil phreatic groundwater contamination

Accepted Products

Bring them back to the drugstore

Must be treated to reduce their dangerousness, then eliminated

Can be recycled or valued

How should I dispose of them?

- 1 Preferred Choice: **The Eco-Center**
- 2 WEEE + HHW: **HHW Days**
- 3 WEEE: **Bulky waste collection**

DID YOU KNOW?

WEEEs will first be put on pallets at the Eco-Center and then ARPE-Québec will take care of sending them to the accredited recycling plants.
Ecofees with purchase
 ↓
 Finance the recycling of WEEEs

! ATTENTION

To prevent the degradation of the environment and preserve your confidential data, let your WEEE down the road for the shortest time possible.

WEEE

WEEEs must be treated with precautions since they contain:

Hg + Pb Mercury Lead	Au + Ag Gold Silver	Nd + Dy Neodymium Dysprosium
! TOXIC	Rare metals	Rare earth
Plastic, glass, steel		
Can be recycled		

They can be recycled to avoid the depletion of resources!

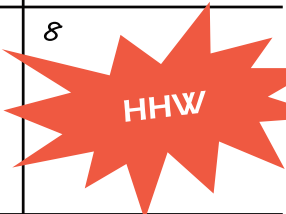

Accepted Products

NUMBERS THAT COUNTS

Eco-Centers in Rocher-Percé RCM have allowed to divert close to 20 tons of HHWs and 29 tons of WEEEs from the landfill site in 2017.

COMPOSTING – At Home

Accepted and Rejected Materials in the Brown Bin

What goes into the brown bin?

Organic materials! Everything that comes from living organisms such as plants and animals.

FOOD

- Leftovers
- Coffee and tea (grounds, filters and bags)

GREEN RESIDUES

- Branches (Max. 1 inch in diameter)
- Leaves, grass, hay, etc.

Put in the recycling if clean!

OTHERS

- Soiled papers and cardboard (put in the recycling if clean!)
- Animal litter (including excrement)
- Sand and earth

See page 26 for a complete list

- Dust and hair
- Ashes
- Textiles
- Household Hazardous Waste (HHW)
- Diapers
- Cigarette butts
- Ceramics
- Dead animals

So, what DOES NOT GO into the brown bin?

No glass, no plastic, no metal! But also...

How to proceed at home?

- 1 Have your counter bin within reach and double it with some newspaper or a paper bag
- 2 Transfer the content of your counter bin in your brown bin, alternating with **dry materials**

Trick of the Lasagna

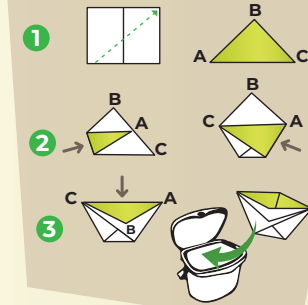

What are “dry materials”?

- WET MATERIALS
- DRY MATERIALS
- WET MATERIALS
- DRY MATERIALS
- WET MATERIALS
- DRY MATERIALS

Dead leaves, branches, dry grass, newspaper, cardboard, etc. Stock up on these materials to make sure you have them all year long!

Brown Bin Origami

Counter bin

Newspaper

Organic material

- 3 Put your bin down the road

Follow the instructions on page 4 (month of February)

In the summer, put it down the road **EVERY** week to avoid smelling and maggot problems!
In the winter, only put it down the road when needed

DID YOU KNOW?

In 2017, more than 40 % of the materials discarded by the citizens of the Rocher-Percé RCM should have been composted.

A problem? A solution!

How to avoid maggots and flies?

Prevent flies from laying eggs on meat and fish by wrapping them in newspaper. This is called the “papillote” trick! You can also keep them in the freezer until the day of collection.

How to prevent materials from freezing and sticking at the bottom of the bin during winter?

Try the “antifreeze” trick!

over the bottom of the bin with dry materials and use a “yard waste paper bag” + avoid putting liquids in the mix!

RECYCLING OF GLASS

From the local blue bin, sorted here, converted here and reused here!

HOW DOES IT WORK?

VERRE L'INNOVATION

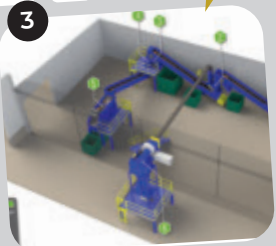

We receive about 500 tons of glass / year

You recycle your glass containers...

They arrive at the Grande-Rivière Recycling Plant...

And go through glass implosion line...

We convert until 5 tons of glass / day

To be converted into glass granulate, 99% pure and that does not cut!

Then you just have to use it for your own projects!

VERRE L'INNOVATION

What you need to know...

- ✓ Rinse your pots, containers, bottles, etc.
- ✓ We also accept broken glass!
- ✓ For sale, we adjust to your needs... Call us!

(0-6 mm)
 in bag in pail in superbag

(6-25 mm)
 For aesthetic and artistic projects

✓ For more information, call us! (418) 385-4200

DID YOU KNOW?

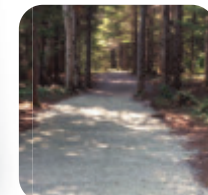

With the glass transformation project:
 • We create 2 jobs
 • We cut expenses by approximately \$80,000

NUMBERS THAT COUNTS

Nearly 300 tons of glass are recovered since the installation of the new sorting line!

COMPOSTING SITE

Once my brown bin is emptied, where are the materials going?

At the Chandler composting site, through a box system that allows to never travel empty.

TRIVIA QUESTION

Why cannot we put compostable plastic bags in the brown bin?

- A** Their real decomposition time is too long;
- B** They prevent food from mixing to dry materials, which is essential for composting;
- C** They will need to be open during manual sorting;
- D** All of the above.

Instead choose newspaper or brown paper bags!

NUMBERS THAT COUNTS

In 2017, the residential collection of brown bins in the Rocher-Percé RCM has allowed to divert **945 tons** of organic materials from the landfill!

 X 126

What are the steps of the composting process?

- 1** Organic materials are discharged on a platform and employees remove the contaminants, plastic, glass, metal, etc.
- 2** Materials are crushed and wood chips are added.
- 3** We mix everything to integrate oxygen and foster the work of microorganisms (bacteria, mushrooms, etc.).
- 4** We let the piles of compost mature for 4 to 6 months. The temperature can reach 75°C!
- 5** We sieve the mature compost to remove impurities and then we send samples for laboratory analysis to ensure its quality.
- 6** The compost is sold in bulk at the composting site of Chandler or in bags in hardware stores on the territory.

DID YOU KNOW?

The composting site, where five persons work, is now the property of the RITMRC (Rocher-Percé RCM and T own of Gaspé). Therefore, this site is yours. Take care of it by avoiding contaminants!

This is why it is safe to put tissues and litter in the brown bin!

Why cannot I get free compost? I have worked for this...

Sale of compost allows to recover taxes and thus lower the operating costs of the site

Québec Waste Reduction Week (QWRW)

CONSUME DIFFERENTLY

SQRD
SEMAINE QUÉBÉCOISE
DE RÉDUCTION
DES DÉCHETS
OCTOBER 19-27, 2019

Follow the **RITMRG** on **Facebook** and visit our website for details on the programming.

In 2018, the Grande-Rivière recycling center has welcomed nearly **500 students** and visitors during its open houses!

NUMBERS THAT COUNTS

In 2015, **24%** of the waste buried by the Rocher-Percé RCM should have been put in the blue bin!

DID YOU KNOW?

The installations of the RITMRG (composting site, recycling center, engineered landfill, Eco-Centers) can be visited all year long! Call us for an appointment!

The 4R: Residual material management hierarchy

At the Store

I bring my reusable bags!

I prioritize unpackaged items or items with recycled packaging.

During my Outings

I have with me at all times:

- A container
- Utensils
- A reusable mug

At Home

I refuse flyers with the sticker:

TO CONSUME DIFFERENTLY

I buy **second hand** and I give my objects that are **STILL USABLE** to a donation center or organization who need them

I buy **sustainable** and repairable products

I learn to **repair** my objects

I **share** my tools with my close relatives

OUR IMPACT

The Residual Materials Lifetime

When we throw a waste in nature, it does not disappear right away!

Plastic is often found in the ocean where it breaks into small particles that can then be swallowed by fishes and finish in our plates! Moreover, sea currents form what we can call "plastic continents"

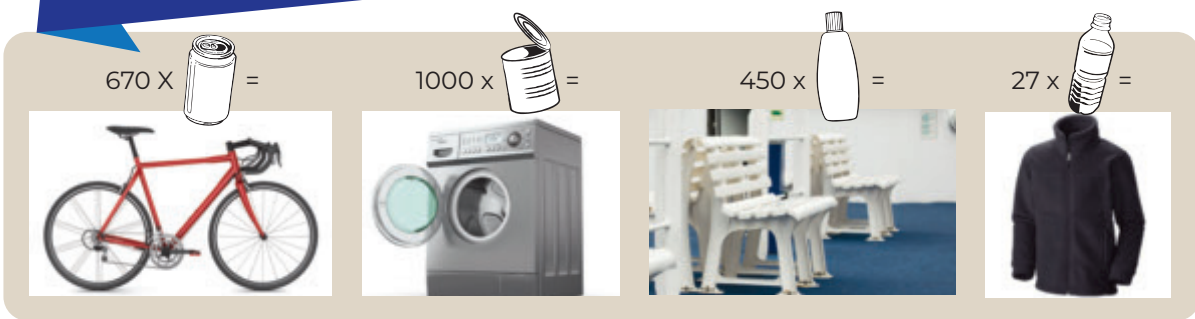

In the world, **137,000 cigarette butts** are thrown away every second!

A cigarette butt thrown to the ground corresponds to...

- 4,000 chemicals released to the environment
- 500 liters of polluted water

YOU can make a difference by disposing of your materials at the right places

And what if we had recycled them...

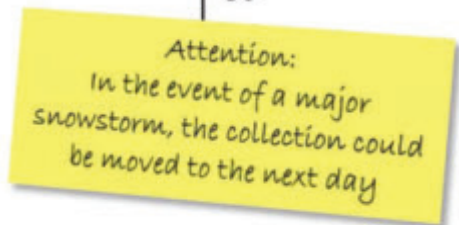

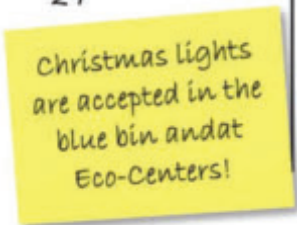

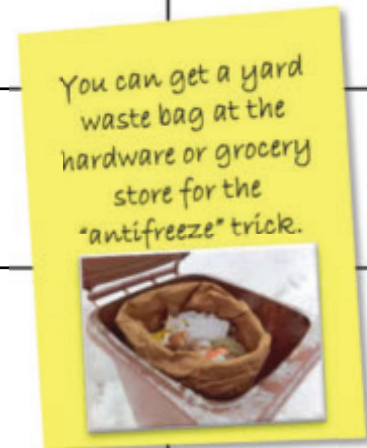

Benefits for the Region

- Disposing of organic materials in the brown bin is...**
- Supporting **five jobs** at the composting site of Chandler.
 - Giving a second life to the materials by generating great quality compost.
- Disposing of recyclable materials in the blue bin is...**
- Supporting **sixteen jobs** at the recycling center of Grande-Rivière.
 - Giving a second life to the materials by producing new recycled products.

Coopérer pour créer l'avenir

Nous sommes nombreux à croire qu'investir en environnement est gage de prospérité durable.

LANDFILLING

What is an engineered landfill?

An engineered landfill is a series of sealed cells that we fill with our waste. Once the capacity is reached, we permanently close these cells with an airtight "hat."

- **Waste Water (leachates):** Waste water are treated and then tests are performed (26 parameters imposed by the ministry) before being discharged into the river

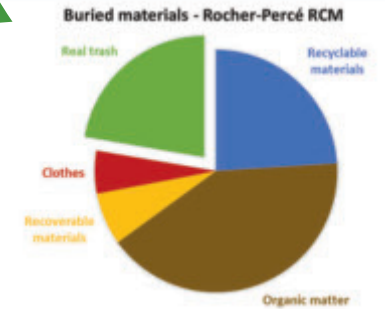

- **Biogas (methane [CH₄] and carbon dioxide [CO₂]):** Gas generated at the time of the decomposition of the buried materials are flared. This way, we greatly reduce their impact on climate changes.

What do we bury?

A characterization study done in 2015 has shown that only **22%** of buried materials coming from the Rocher-Percé RCM are real waste. The vast majority of what is buried should have rather been disposed in the brown bin, the blue bin or at the Eco-Center.

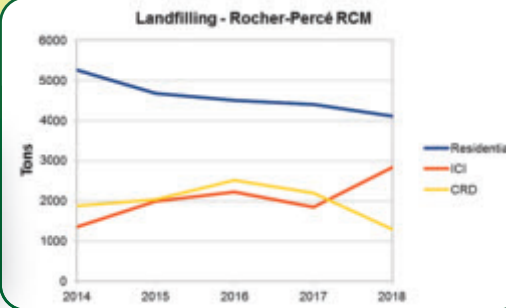

What is a « real trash »?

It is a material that cannot be recycled, composted or recovered at the Eco-Center. The more we reduce landfilling, the more we reduce costs.

Throughout the Years...

Since 2014, there has been a notable decrease of buried materials coming from the residential sector thanks, notably, to the participation to composting and Eco-Centers.

NUMBERS THAT COUNTS

In 2017, the treatment of biogas has prevented nearly **4,900 tons** of CO₂ equivalent. For 2018, the objective is of **8,500 tons**.

DID YOU KNOW?

Landfilling costs up to twice more than composting and recycling. **It pays to sort!**

Reminder

Do not forget your good habits during the holidays... 😊

- Paper wrappings are recyclable, but not those in plastic.
- Natural Christmas trees support local businesses and can be recovered at the Eco-Center!
- Leftovers from the holiday feast can also be composted!

Accepted Materials

BLUE BIN

CONTAINERS-PACKAGING-PRINTS

Paper and Cardboard

Newspapers, flyers, magazines, books, catalogues, phone books, brown bags, white and colored paper, envelopes, cardboard box, egg cartons, juice or milk cartons (Tetra Pak®), lottery tickets.

Plastics

All plastic containers (except #6), bags and transparent plastic films (e.g. Saran wrap).

Glass

Wine, beer and alcohol bottles, any glass container.

Metal

Tin, paper and aluminum containers, lids, beer caps, cans.

Tips and Tricks

See month of March (p. 6)

If in doubt, put in the **green bin** to avoid contamination and in order to not disrupt the sorters' work.

Thank you!

Download **Ça va où?**, the application from RECYC-QUÉBEC! (in French only)
Or call the RITMRG! 

BROWN BIN

Food Residues

Leftovers, fruits and vegetables, eggs and egg shells, coffee and coffee filters, nut shells, desserts, seafood (including shells), breads, pastas and cereals, fish (including bones), meats and poultry (including bones and fat), dairy, tea and herbal tea bags.

Green Residues

Little branches (max. diameter: 1 in), wood chips and sawdust, leaves, weeds, grass, straw and hay, plants.

Other Compostable Materials

Soiled packaging and paper (pizza boxes, soiled egg cartons, muffin cups, etc.), newspapers, paper towels, napkins and tissues, litter, sand and earth.

Tips and Tricks

See month of July (p. 14)

BULKY WASTE COLLECTION

These materials are also accepted in the bulky waste collection, as well as:

Wood pallets, doors, windows, pool components, recyclable materials, styrofoam.

Instructions:

See month of May (p. 10)

ECO-CENTER

Construction, Renovation and Demolition (CRD) Residues

Asphalt shingle, gypsum, vinyl siding, insulation, aggregate residues (concrete, brick, asphalt, stone), windows, sound wood (pallets, untreated), non-sound wood (painted, stained, treated).

Household Hazardous Waste (HHW)

Batteries, compact fluorescent light bulbs and fluorescent tubes, paints, primers, diluents, cooking oil, motor oil and empty containers, acids or ammonia solutions, fertilizers and pesticides, cleaning and scrubbing products.

Green Residues

Branches and bags of leaves

Bulky Waste

Electrical appliances, tubs, sinks, toilets, furniture, mattresses, bedsprings, big toys, bicycles, carpet and flooring, water heater, ferrous and non-ferrous metals, BBQ (no bottle).

Waste Electrical and Electronic Equipment (WEEE)

Televisions, computers, keyboards, screens, printers, cellphones, chargers, etc.

Tires

Tires (with or without rims), maximum of 48 in.

Instructions:

See month of April (p. 8)

GREEN OR BLACK BIN

Non-Recyclable Plastics

Plastic #6 (styrofoam, coffee cup lids, etc.), packaging without recycling symbol, individual yogurt containers, plastic utensils, straws, coffee stirrers, non-flexible packaging, adhesive tape, self-adhesive labels.

Multi-Material Packaging

Chip bags, laminated bags (several layers of plastic, aluminum, cardboard, etc.), chewing gum packs.

Non-Reusable Textiles

All textiles too worn to be given to a recycling organization (thrift shop) must be thrown away.

Personal Hygiene Products

Diapers, sanitary pads, tampons, dental floss, toothbrushes.

Others

Hair, vacuum dusts, dryer lint, cigarette butts, ceramics, incandescent bulbs, VHS.
